

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 1 - Relating to His/Her Own Body

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
<b>SEO 1</b>	<b>Symbiosis</b>		
0-6 months	Discovering the body, processing sensory stimuli	<ol style="list-style-type: none"> <li>1 Is aroused by physical sensations / environmental stimuli</li> <li>2 Is soothed by repeated exposure to familiar sounds, faces, smells or tastes</li> <li>3 Is soothed by physical contact (e.g. touch, caresses, massages)</li> <li>4 Explores his/her body haphazardly by touching, grasping, (thumb) sucking</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 2</b>	<b>Attachment</b>		
6-18 months	Using the body to explore the environment	<ol style="list-style-type: none"> <li>1 Uses his/her body deliberately for the purpose of exploration, i.e. grasping, touching and handling objects</li> <li>2 Communicates with his/her entire body; few specific gestures</li> <li>3 Uses his/her mouth as a primary means of exploration (e.g. putting things in his/her mouth, thumb sucking etc. )</li> <li>4 Smears faeces</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 3</b>	<b>Autonomy</b>		
1.5-3 years	Deliberate engagement with the environment	<ol style="list-style-type: none"> <li>1 Deliberately draws on means in the environment to assert his/her will</li> <li>2 Deliberately uses gestures as a means of communication</li> <li>3 Is not capable of keeping clothing clean; clothes are usually soiled after meals</li> <li>4 Shows no recognizable sense of shame</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 4</b>	<b>Social Roles</b>		
3-7 years	Identity based on physical characteristics	<ol style="list-style-type: none"> <li>1 Deliberately uses specific gestures to communicate</li> <li>2 Begins to select clothing according to the occasion and personal taste</li> <li>3 Can manage adequate personal hygiene without help</li> <li>4 Sense of shame and gender identity (e.g. closes door when using the toilet, wants to shower alone)</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 5</b>	<b>Social Contexts</b>		
7-12 years	Realistic assessment of physical characteristics	<ol style="list-style-type: none"> <li>1 Wants to demonstrate physical prowess to impress peers</li> <li>2 Displays modesty/sense of shame in respect to sexuality</li> <li>3 Displays marked personal preferences in choosing outfit</li> <li>4 Is able to assess his/her physical appearance and abilities realistically in relation to the environment</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 2 - Relating to Attachment Figures

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
<b>SEO 1</b>	<b>Symbiosis</b>		
0-6 months	Establishing contact via the proximal senses	<ol style="list-style-type: none"> <li>1 Interaction arises when meeting basic needs (food, hygiene)</li> <li>2 Is soothed by physical contact (sense of security)</li> <li>3 Makes contact via the proximal senses (touch, smell and taste)</li> <li>4 Is fascinated by (sniffs, touches etc.) specific parts of caregivers' body</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 2</b>	<b>Attachment</b>		
6-18 months	Establishing contact via the proximal and distal senses	<ol style="list-style-type: none"> <li>1 Begins to interact with others deliberately (e.g. smiles, returns smile)</li> <li>2 Establishes an emotional hierarchy, fixation on attachment figures</li> <li>3 Breaking off contact induces responses ranging from tension to agitation</li> <li>4 Interaction possible via objects (e.g. passing a ball back and forth)</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 3</b>	<b>Autonomy</b>		
1.5-3 years	Establishing contact via the distal senses, objects and language	<ol style="list-style-type: none"> <li>1 Demands attention and tests limits</li> <li>2 Objects, desires and contradiction are frequent reasons for initiating contact</li> <li>3 Demonstrates and (stubbornly) insists on his/her will (emergence of the ego / ideas of grandiosity)</li> <li>4 Varies emotions directed at attachment figures</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 4</b>	<b>Social Roles</b>		
3-7 years	Guided peer group	<ol style="list-style-type: none"> <li>1 Begins to regard attachment figures as authority figures (group leaders, teachers etc.)</li> <li>2 Wants to assume the role of authority figures ("deputy sheriff")</li> <li>3 Increasingly identifies with authority figures, even when they are not physically present</li> <li>4 Solicits the opinion/ seeks the approval of authority figures</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 5</b>	<b>Social Contexts</b>		
7-12 years	Establishing contact using social and cognitive skills	<ol style="list-style-type: none"> <li>1 Is able to navigate within familiar social contexts without guidance from an authority figure</li> <li>2 Can manage transitions between familiar social contexts alone</li> <li>3 Can identify different social contexts without help &amp; meet situational demands (e.g. find his/her way around a train station)</li> <li>4 Can assume simple responsibilities</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 3 - Interaction Patterns (Differentiation of Self)

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
SEO 1 0-6 months	<b>Symbiosis</b> Unspecific interaction in response to various stimuli	<ol style="list-style-type: none"> <li>1 Interaction is only possible with direct physical contact or within a radius of two metres</li> <li>2 Is hypersensitive to sensory overload</li> <li>3 Is primarily occupied with processing internal and external stimuli</li> <li>4 Proximal stimuli are dominant, unfocused exploration of things within reach</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 2 6-18 months	<b>Attachment</b> Simple, rigid interaction patterns	<ol style="list-style-type: none"> <li>1 Begins to develop simple situational interaction patterns</li> <li>2 Is upset when interaction patterns are interrupted</li> <li>3 Is unable to modify interaction patterns according to situational demands</li> <li>4 Repeats interaction patterns without regard to the situation</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 3 1.5-3 years	<b>Autonomy</b> Assertion of will and independence; consolidation of the ego	<ol style="list-style-type: none"> <li>1 Thinks egocentrically and expresses his/her will</li> <li>2 Increasingly distinguishes between self and others</li> <li>3 Modifies interaction patterns solely according to his /her own will and aims</li> <li>4 Opposes demands/requests from others</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 4 3-7 years	<b>Social Roles</b> Guided social interaction	<ol style="list-style-type: none"> <li>1 Modifies interaction patterns in accordance with authoritative demands</li> <li>2 Imitates authority figures in interaction patterns</li> <li>3 Adapts interaction patterns according to his/her (frequently gender-specific) self-image</li> <li>4 Adapts interaction patterns to the dynamic of the peer group rather than social norms</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 5 7-12 years	<b>Social Contexts</b> Independent interaction	<ol style="list-style-type: none"> <li>1 Is able to apply standard interaction patterns in different social contexts</li> <li>2 Independently and appropriately adapts interaction patterns to familiar social contexts</li> <li>3 Is able to transfer interaction patterns to new, but similar social contexts</li> <li>4 Is able to combine overlearned interaction patterns</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 4 - Dealing with Changes in the Environment

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
SEO 1	<b>Symbiosis</b>		
0-6 months	Dependence on the situation: "What I can't see or feel doesn't exist."	<ol style="list-style-type: none"> <li>1 Perceives the environment via the proximal senses ( touch, smell and taste)</li> <li>2 Explores the environment via the proximal senses</li> <li>3 No object permanence - objects/people only "exist" when they are perceived directly</li> <li>4 Is upset when soothing objects disappear</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 2	<b>Attachment</b>		
6-18 months	"Things exist even if I can't see or feel them."	<ol style="list-style-type: none"> <li>1 Environment is perceived and explored with proximal and distal senses</li> <li>2 Is only aware of people/objects not perceived directly if they are relevant to his/her immediate needs</li> <li>3 Increasingly distinguishes between objects and people</li> <li>4 Is upset when emotionally charged objects/people disappear</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 3	<b>Autonomy</b>		
1.5-3 years	Navigating familiar environments with reassurance	<ol style="list-style-type: none"> <li>1 Can transfer attachment to objects (transitional/comfort objects)</li> <li>2 Consistently distinguishes between people and objects; deliberate engagement with objects</li> <li>3 Displays basic emotions at the appearance/loss of highly emotionally charged objects</li> <li>4 Understands that people/objects exist even when they cannot be perceived directly</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 4	<b>Social Roles</b>		
3-7 years	Navigating familiar environments without reassurance/guidance	<ol style="list-style-type: none"> <li>1 Is able to part with transitional object in a familiar environment</li> <li>2 Social aspects of the environment become increasingly important</li> <li>3 Can relate to others in his/her environment in ways appropriate to the situation</li> <li>4 Needs to be accompanied by an authority figure in unfamiliar surroundings (e.g. when taking the bus)</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 5	<b>Social Contexts</b>		
7-12 years	Navigating unfamiliar but similar environments without guidance	<ol style="list-style-type: none"> <li>1 Can navigate within familiar social contexts without guidance</li> <li>2 Recognizes what behaviour is appropriate in a given situation</li> <li>3 Can apply familiar behavioural principles to unfamiliar contexts according to social conventions</li> <li>4 Can combine familiar behavioural principles as required by the situation</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 5 - Anxiety/Fears

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
<b>SEO 1</b>	<b>Symbiosis</b>		
0-6 months	Unfamiliar and/or intense stimuli provoke fear and anger	<b>1</b> Feeding alleviates anxiety <b>2</b> Is afraid of loud noises <b>3</b> Responds to new visual stimuli with fear <b>4</b> Anxiety is alleviated by intensive physical contact	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 2</b>	<b>Attachment</b>		
6-18 months	Fear of abandonment	<b>1</b> Lack/loss of contact with attachment figures induces anxiety and anger <b>2</b> Is anxious anxiety in unfamiliar/confusing environments <b>3</b> Is afraid of being alone <b>4</b> Anxiety is assuaged by contact with attachment figures	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 3</b>	<b>Autonomy</b>		
1.5-3 years	Situational fears	<b>1</b> Anxiety and fear in reaction to specific situations <b>2</b> Is afraid of the dark <b>3</b> Is not capable of regulating anxiety cognitively <b>4</b> Develops strategies to manage fear/anxiety (transitional object, seeking reassurance from attachment figure)	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 4</b>	<b>Social Roles</b>		
3-7 years	Fear of failure	<b>1</b> Is anxious when self-esteem/self-image are threatened <b>2</b> Is afraid of doing something wrong <b>3</b> Is afraid of disapproval from authority figures/ role models <b>4</b> Is capable of regulating anxiety using cognitive means	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 5</b>	<b>Social Contexts</b>		
7-12 years	Social anxieties	<b>1</b> Is afraid of punishment <b>2</b> Anticipated danger or loss induces anxiety <b>3</b> Is afraid of being unable to cope with demands <b>4</b> Is afraid of being criticized or not being accepted by peers	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 6 - Relating to Peers

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
<b>SEO 1</b>	<b>Symbiosis</b>		
0-6 months	No interaction with peers	<ol style="list-style-type: none"> <li>1 Is entirely self-absorbed</li> <li>2 No interaction with peers</li> <li>3 Cannot distinguish between caregivers and peers</li> <li>4 Forced contact leads to pronounced inner tension</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 2</b>	<b>Attachment</b>		
6-18 months	Beginning interest in interaction with peers, but attachment figure is still primary	<ol style="list-style-type: none"> <li>1 Distinguishes between caregivers and peers</li> <li>2 No deliberate interaction with peers</li> <li>3 Is unable to adapt interaction patterns to peers; turns to attachment figure for reassurance</li> <li>4 Interaction with peers requires initiation by caregivers</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 3</b>	<b>Autonomy</b>		
1.5-3 years	Self-centred in interaction with peers	<ol style="list-style-type: none"> <li>1 Interaction with peers possible when caregivers are present</li> <li>2 Shows no consideration for what peers want</li> <li>3 Interaction with peers frequently leads to conflict</li> <li>4 Is unable to regulate proximity/distance in interaction with peers appropriately</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 4</b>	<b>Social Roles</b>		
3-7 years	Guidance required in interaction with peers	<ol style="list-style-type: none"> <li>1 Increasingly focused on peers; seeks and maintains regular contact</li> <li>2 Seeks to establish his or her role/position within the peer group</li> <li>3 Meets demands of his/her assigned role only when an authority figure is present</li> <li>4 Seeks approval of peers without regard to normative behaviour</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 5</b>	<b>Social Contexts</b>		
7-12 years	Independent interaction with the peer group	<ol style="list-style-type: none"> <li>1 Assumes a consistent role within the peer group even when no authority figure is present</li> <li>2 Adapts his/her role according to the dynamics of the peer group</li> <li>3 Seeks approval of peers, but with consideration for normative behaviour</li> <li>4 Begins to assert his/her independence from the peer group</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 7 - Relating to Objects

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
SEO 1	<b>Symbiosis</b>	<ol style="list-style-type: none"> <li>1 Does not actively seek out objects</li> <li>2 Stereotypical handling of objects</li> <li>3 Does not attempt to determine objects' function</li> <li>4 Interaction with objects is haphazard and brief</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
0-6 months	Coincidental exploration of objects		
SEO 2	<b>Attachment</b>	<ol style="list-style-type: none"> <li>1 Deliberately seeks out and explores objects</li> <li>2 Explores shapes and characteristics of objects and substances</li> <li>3 Tears paper/pillows etc. into shreds to produce amorphous masses</li> <li>4 Uses/operates objects with simple functions, often repetitively (e.g. faucets, switches, toilet flush)</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
6-18 months	Exploring objects within reach		
SEO 3	<b>Autonomy</b>	<ol style="list-style-type: none"> <li>1 Uses objects to represent animals, people, cars etc.</li> <li>2 Can operate objects with a simple function (e.g. radio)</li> <li>3 Takes functional objects apart</li> <li>4 Requires guidance when using items whose function is not immediately apparent</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
1.5-3 years	Exploring structure and function of objects		
SEO 4	<b>Social Roles</b>	<ol style="list-style-type: none"> <li>1 Understands objects' purpose and uses them accordingly</li> <li>2 Draws representationally and builds functional objects</li> <li>3 Puts objects to use in new functional contexts</li> <li>4 Understands items' value</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
3-7 years	Using objects creatively and appropriately		
SEO 5	<b>Social Contexts</b>	<ol style="list-style-type: none"> <li>1 Varies the use of objects and employs them more effectively</li> <li>2 Specifically collects certain things</li> <li>3 Can delay gratification to work toward a goal; the final result is important (productive employment possible)</li> <li>4 Recognition for the final product is primary</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
7-12 years	Purposefully working to achieve a specific result		

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 8 - Communication

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
SEO 1	<b>Symbiosis</b>		
0-6 months	No verbal communication	<ol style="list-style-type: none"> <li>1 Communication is spontaneous, non-verbal and not addressed to anyone in particular</li> <li>2 Communicates using basic facial expressions and his/her entire body</li> <li>3 Unspecific vocalizations</li> <li>4 Physical and emotional states are expressed spontaneously</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 2	<b>Attachment</b>		
6-18 months	Individual words are used, but most communication is non-verbal	<ol style="list-style-type: none"> <li>1 Communicative repertoire covers basic everyday situations (greeting, food, going to the toilet)</li> <li>2 Utterances consist of one or two words</li> <li>3 Uses a small number of words fairly unspecifically in a wide range of situations</li> <li>4 Repeats words without reference to the given situation</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 3	<b>Autonomy</b>		
1.5-3 years	Language is the primary means of communication	<ol style="list-style-type: none"> <li>1 Short ungrammatical utterances</li> <li>2 Uses names and first- and second-person singular pronouns ("I" and "you")</li> <li>3 Most communication is verbal</li> <li>4 Communicates specifically to express needs, feelings, wants (usually related to the given situation)</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 4	<b>Social Roles</b>		
3-7 years	Personal experience and imagination are drawn on when communicating	<ol style="list-style-type: none"> <li>1 Uses complete sentences and all personal pronouns, understands requests addressed to the group</li> <li>2 Asks numerous questions (why...?), shows interest in others' stories</li> <li>3 Makes up stories</li> <li>4 Deliberately engages others in dialogue</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 5	<b>Social Contexts</b>		
7-12 years	Topics are discussed from a wider perspective	<ol style="list-style-type: none"> <li>1 Uses language grammatically</li> <li>2 Engages in dialogue on everyday and/or situational topics</li> <li>3 Can hold conversations on simple abstract topics (e.g. football, giving opinion of a film)</li> <li>4 Initiates conversations on subjects of his/her choosing</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 9 - Recognizing Emotions

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
<b>SEO 1</b>	<b>Symbiosis</b>		
0-6 months	Primary emotions in response to stimuli	<ol style="list-style-type: none"> <li>Emotions are diffuse and unfocused</li> <li>Displays pleasure and displeasure in response to physical states</li> <li>Negative emotions are primarily manifested as anger</li> <li>Positive emotions are primarily manifested as smiling/laughter</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 2</b>	<b>Attachment</b>		
6-18 months	Directed, recognizable emotions	<ol style="list-style-type: none"> <li>Can distinguish basic emotions (happiness, affection/liking, fear, anger)</li> <li>Directs his/her own emotions at attachment figures and mirrors their emotions</li> <li>Responds to loss of attachment figure with anxiety or other negative emotions</li> <li>Is unable to label his/her own emotions clearly</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 3</b>	<b>Autonomy</b>		
1.5-3 years	Distinguishing basic emotions in self and others	<ol style="list-style-type: none"> <li>Is able to name his/her basic emotions (fear, sadness, anger, happiness, affection/liking, pride)</li> <li>Recognizes basic positive/negative emotions in others</li> <li>Wants attachment figures to him-/herself (jealousy)</li> <li>Projects his/her own emotions onto attachment figures</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 4</b>	<b>Social Roles</b>		
3-7 years	Empathy, guilt, shame; emotions are no longer tied solely to attachment figures	<ol style="list-style-type: none"> <li>Emotions are influenced by interaction with the environment</li> <li>Empathy begins to develop</li> <li>Feels ashamed/guilty in accordance with the situation (e.g. when caught doing something wrong)</li> <li>Can modulate his/her emotions by referring to role models</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<b>SEO 5</b>	<b>Social Contexts</b>		
7-12 years	Emotions can be induced by hypothetical situations	<ol style="list-style-type: none"> <li>Emotions are linked to abstract considerations</li> <li>Increasingly sees things from others' perspective and empathizes with how they feel</li> <li>Examines his/her negative emotions (introspection) and applies cognitive strategies to evade them ( reflection)</li> <li>Conscience (regret, shame) and a moral frame of reference develop (obeys rules, right/wrong)</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

# SEO: Assessment of Socio-Emotional Development and Needs

## Domain 10 - Regulating Aggression

Level	Primary Emotional Needs and Issues	Behaviour/Characteristics/Abilities	Yes
SEO 1 0-6 months	<b>Symbiosis</b> Aggression is unregulated and undirected	<ol style="list-style-type: none"> <li>Has no means of regulating aggression autonomously</li> <li>Auto-aggressive behaviour is often triggered by internal dysregulation (e.g. pain, constipation)</li> <li>Sensory overload can lead to (auto-)aggression</li> <li>Limited possibilities for others to regulate aggression</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 2 6-18 months	<b>Attachment</b> Aggression is regulated externally	<ol style="list-style-type: none"> <li>Aggression is preceded by irritability</li> <li>Aggression is aimed directly at the trigger/cause</li> <li>Severe inner tension may erupt in undirected aggression</li> <li>Aggression is regulated externally by contact with attachment figures</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 3 1.5-3 years	<b>Autonomy</b> Aggression is regulated internally	<ol style="list-style-type: none"> <li>Can modulate the intensity of his/her aggression autonomously</li> <li>The focus/target of aggression is determined independently of the triggering situation</li> <li>Aggression is directed against objects/people that impose limits</li> <li>Has difficulty expressing aggression consistently using verbal means</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 4 3-7 years	<b>Social Roles</b> Aggression is modulated according to balance of power	<ol style="list-style-type: none"> <li>Aggression is specifically directed at certain peers</li> <li>Assesses the balance of power in a given situation and regulates aggression accordingly</li> <li>Can consistently express aggression using verbal means</li> <li>Is able to discuss the causes and effects of his/her aggressive behaviour</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
SEO 5 7-12 years	<b>Social Contexts</b> Aggression is modulated according to the specific situation	<ol style="list-style-type: none"> <li>Is able to vary and control the intensity and expression of his/her aggressive impulses Regulates aggression out of fear of negative consequences</li> <li>Can draw on strategies to circumvent aggression</li> <li>Aggression can arise due to factors unrelated to the immediate situation</li> </ol>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
